

# THREADED

A system for working across analog and digital

## TIGHT TAP

A raw idea before it has a name. One line. One thought. Captured before it disappears.

## TETHER THREAD

One per project. Lives on your clipboard. Keeps you connected to your digital work even when you're away from a screen.

## THE TRACK

One per working session. Send it ahead. Log what happens in real time. Close it out and photograph it before you leave.

## TETHER TOUCH

Your weekly pulse check. Flip through every active Tether Thread. See what moved, what stalled, and what actually matters this week.

# THREADED

THE SYSTEM THAT HOLDS IT ALL TOGETHER. **ANALOG AND DIGITAL,** WORKING IN PARALLEL - NOTHING FALLS THROUGH THE CRACKS.
