HOW TO USE

Full out your Tether Threads. One row per active project. Write fast – this is a pulse check, not a deep dive.

"Needs a thread?" – is it time to open a new AI conversation on this project?

TETHER TOUCH

Your weekly pulse check. See what moved, what stalled, and what actually matters this week.

These ideas already passed the "worth a thread?" test on your Tight Tap. This side is about closing the loop – did the thread actually get opened?

Check "Done" when the thread exists. Write the project number so the idea is officially tethered.

TIGHT TAP SCAN

A quick pass through this week's captured ideas. Decide what graduates to a project.
